

MINI CEILING ROSE - COPPER

The Mini Ceiling Rose is a fast and efficient solution for covering electrical connections directly from the ceiling, featuring a simple and clean-lined design. It does not allow the installation of power supplies or external connections via conduit for surface-mounted electrical systems.

TECHNICAL SPECIFICATIONS

Standard	IEC/EN 602208 IEC/EN 60670-1
Material	Galvanized steel
Treatment	Copper plating
Protection grade IP	IP20
Impact resistance	IK10
Isolation class	0
Storage temperature	-50°C - +80°C
Operating temperature	-40°C - +70°C

RSB60

Dimensioni (mm) Ø 60
